

make it personal

transcend time & trends with one-of-a-kind furnishings

unexpected pieces in unexpected places tell a personal story

Rare art collections aren't the only route to a unique, stylish home. Personalizing our homes simply means using furniture with personality... and placing it where it's sure to be used.

Artistic qualities (like a *French script* fabric) add unexpected style to a dining chair, making it the perfect companion next to a desk, sofa or bed. Or pair it with a floor mirror to create a pretty dressing area.

Floor mirrors add glamour and personality at home... especially if they're injected with a unique finish or splash of exotic style. A two-tone zebra print is simple and bold, making it versatile and unforgettable.

A small writing desk feels personal and nostalgic. This versatile, go-anywhere piece lets you write out a recipe or check your emails. With antique reproduction hardware or other unique details, even simple tables and desks can look like they have a history! Tucking a one-of-a-kind chair or ottoman below them creates unexpected warmth.

Unique chests and console tables transcend generations, life stages and room locations! More than handy, these accent pieces go in the unexpected places - between or in front of windows, by the door at the end of a hallway.
